WORK EXPERIENCE

Jr. Site Reliability Engineer

March 2025 - Present

eTap Inc.

Makati City, Manila

- Managed and optimized AWS infrastructure (EC2, S3, EBS, DynamoDB, VPC) across environments, including rightsizing instances and cleaning up unused resources to cut monthly cloud spend by 30%.
- Participated in a 24/7 on-call rotation, performing root-cause analysis and incident response; identified and resolved a recurring issue that had been causing incidents.
- Set up monitoring and alerting with CloudWatch and Grafana, giving the SRE team earlier visibility into CPU, Memory, and Disk-usage thresholds before they triggered failures.
- Wrote Terraform configurations to replace manually provisioned AWS resources, cutting environment setup time from 1 day to under an hour and eliminating configuration drift between environments.
- Automated recurring operational tasks (log rotation, backups, scheduled report) with Bash scripts and cron jobs, reducing manual effort by roughly 2 hours on Linux servers.
- Produced AWS architecture diagrams for 5 projects, helping development teams understand system components and integration points.

IT Analyst

June 2024 - January 2025

CGIC

San Fernando, Pampanga

- Delivered technical support to 100 end-users experiencing issues with the Core Insurance System, ensuring continuation of critical business operations.
- Optimized PL/SQL scripts to support system workflows, automate data processing, and provide reporting for business operations.
- Developed an inventory management system using HTML, CSS, and PHP for tracking and reporting, resulting in a increase in operational efficiency.
- Designed complex SQL queries for data extraction, reporting, and analysis, enabling data-driven decisions.

CERTIFICATIONS

AWS Certified Solutions Architect - Associate · [Credentials](#)

AWS Certified Developer – Associate · [Credentials](#)

SKILLS

Programming Languages: Python, Bash, SQL, JavaScript, HTML, CSS

Cloud: Amazon Web Services (AWS) – EC2, S3, VPC, IAM, CloudWatch, SNS, Lambda, RDS, Route53, ECS, Bedrock

Other Tools: Terraform, Docker, Git, GitHub Actions, Grafana, Solarwind, TCP/IP, SSH

EDUCATION

B.S. in Computer Engineering

June 2015 - December 2020

Samar State University

Catbalogan City, Samar

PROJECTS

Portfolio Website (*S3, Cloudfront, Certificate Manager, Route53, GitHub Actions*) · [View](#)

Provisioned and deployed a static website on AWS using Amazon S3, CloudFront, AWS Certificate Manager, and Route 53, with automated CI/CD pipelines via GitHub Actions for secure, scalable, and low-latency global content delivery.

CI/CD Fargate Deployment (*GitHub Actions, IAM, OIDC, Fargate*) · [View](#)

Designed and implemented a secure CI/CD workflow for AWS Fargate deployments using GitHub Actions and OIDC federation, eliminating static credentials and improving deployment security and automation reliability.

IaC: Terraform State Management (*Amazon S3, Terraform, remote backend*) · [View](#)

Designed and implemented a resilient Terraform state management architecture using remote backends and state locking, ensuring infrastructure consistency, concurrency control, and reliable collaborative provisioning workflows.
